

LogiLift

a continuously variable service opening for the LogiMat vertical lift...

Our option for LogiMat, the market leading vertical lift, offers extended options for ergonomic picking.

LogiLift is a continuously variable service opening, individually adjustable to the operator in order to guarantee a 100% ergonomically correct picking height...

By combining LogiLift with LogiTilt (tilting device for LogiMat drawers), the world's most ergonomic picking station is obtained.

LogiLift can be delivered as an option on new LogiMat vertical lifts, and it can be mounted on existing units...

LogiLift is of course supported by our picking software SHARK. When an operator logs on, the service opening is automatically adjusted to the programmed personal picking height...
