

## LogiSafe

an electric lockable aluminium roll front for the LogiMat vertical lift...

LogiSafe keeps uninvited guests away from your goods when mounted in the market leading vertical lift LogiMat. LogiSafe is an electric roll front, blocking the service opening of the LogiMat vertical lift when needed... Perfect for the storage of valuable goods.

LogiSafe can be mounted with various locks and automatic trigger devices - our standard version locks with a key. The finish is made of aluminium.

LogiSafe can be combined with our other options, LogiTilt, LogiLift, LogiTurbo, and LogiPointer.

LogiSafe can be delivered as an option on new LogiMat vertical lifts, and can be installed on existing units as well.
